

**Adults in Texas support pharmacists conducting tests and providing treatment for common illnesses such as COVID-19, the flu, strep throat, and UTIs. Adults in Texas also support making permanent recent expansions of pharmacist care to ensure continued access to vaccinations, testing, and treatment for common conditions.**

## TREATING + PREVENTING COMMON CONDITIONS

A majority of adults in Texas support pharmacists providing care to patients experiencing common conditions.

Pharmacist Actions	% Support (Strongly + Somewhat)
Helping patients prevent chronic disease such as heart disease and diabetes	75%
Helping patients to understand their nutritional choices	78%
Testing for and treating common illnesses (i.e. flu, COVID-19, etc.)	73%
Testing for and treating common minor conditions such as strep throat and urinary tract infections (UTIs)	74%
Screening for diabetes	73%
Initiating treatment for diabetes (if screening is positive)	67%
Screening for high cholesterol	76%
Testing for sexually transmitted infections	67%

## CONTINUED ACCESS TO CARE

A majority of adults, including **79%** of adults in Texas believe it's important for their state to update its policies to ensure that patients **permanently have the same access to pharmacy vaccination, testing, and treatment services** that were available during the COVID-19 pandemic.

**83%** of adults in Texas say pharmacists are **easy to access**, the highest percentage of the tested options.

## FAIR COMPENSATION

Adults in Texas also wish to see pharmacists reimbursed by insurers for providing care: **70%** support private and government insurers **adequately paying pharmacists** for testing and initiating treatment in states where pharmacists are authorized to do so.

## SIMPLE TESTING AND TREATMENT

When simple tests exist to help identify common conditions, adults in Texas support pharmacists providing care for the following if a patient tests positive:

**COVID-19: 72%**      **Flu: 77%**  
**Strep Throat: 75%**      **UTI: 73%**

## HIV PREVENTION

Adults in Texas believe pharmacists have a role in helping people prevent HIV.

**69%** support pharmacists administering **simple HIV tests** at pharmacies.

**67%** support pharmacists **prescribing preventative medication** (called PrEP) to those who are seeking to prevent HIV but who have not yet been exposed to it.

**68%** support pharmacists **prescribing preventative medication** (called PEP) to those who have possibly been exposed to HIV.
